PROFESSIONAL SUMMARY

Coverage supervisor for Wing E, the largest unload operation at UPS Worldport, and dual-major Computer Science and Mechanical Engineering student at the University of Louisville J.B. Speed School of Engineering. Brings more than four years of logistics experience, leads time-critical teams, uses KPI and SCADA data to solve operational problems, and applies software, data analysis, CAD, and fabrication skills to operational and engineering projects.

4+ years	90%	1+ year	Single digit
UPS WORLDPORT EXPERIENCE	AVERAGE REDUCTION IN SERVICE FAILURES	TEAMS SUPERVISED WITHOUT REPORTED INJURY	AVERAGE SERVICE FAILURES, SIX MONTHS

PROFESSIONAL EXPERIENCE

Wing E Coverage Supervisor | UPS Worldport | Louisville, KY — **Oct 2026 - Present**

- Provide coverage leadership for Wing E, the largest unload operation at UPS Worldport, coordinating staffing, safety, service, and parcel flow in a time-critical environment.

Inbound Shift Supervisor | UPS Worldport — **Mar 2025 - Oct 2026**

- Led Wing B during the 1DA sort, coordinating ramp, driver, and unload teams at the world's largest express air cargo hub, which processes about two million packages per day.
- Contributed to leading or near-leading results in parcel flow, benchmark turns, cans turned, downtime, sort span, and service quality; Wing B averaged single-digit service failures across a six-month reporting period.
- Supported more than eight months without a reported Wing B injury; teams directly supervised exceeded one year without a reported injury as of September 2026.
- Investigated double-handling failures, led several weeks of package-placement training, and used SCADA to monitor performance below 95%, contributing to an average 90% reduction in service failures.

Unload Supervisor | UPS Worldport — **Jan 2025 - Mar 2025**

- Led unloading operations, improved workflow sequencing, reduced downtime between work areas, and maintained safety and productivity standards.

Ramp Supervisor | UPS Worldport — **Sep 2024 - Jan 2025**

- Coordinated cargo movement, aircraft servicing, team handoffs, routing accuracy, and on-time performance in a time-sensitive operation.

Package Handler | UPS Worldport — **Nov 2021 - Sep 2024**

- Processed high-volume package flow and trained new employees in safe, efficient operating practices.

OPERATIONS STRENGTHS

OPERATIONS TOOLKIT	Team leadership • KPI analysis • Root-cause analysis • Process improvement • SCADA

Mohamed Borhan

PROJECTS • EDUCATION • CREDENTIALS

SELECTED PROJECTS

PlainSight Public Trade Intelligence

INDEPENDENT PROJECT | PYTHON, JAVASCRIPT, HTML/CSS, JSON, GITHUB ACTIONS

- Built a GitHub Pages research site that organizes public SEC Form 4 filings and official congressional trade disclosures in one place.
- Developed filing deduplication, filters, conviction context, post-filing outcome tracking, and a developing weekly research summary.
- Designed the public interface and automated data workflow around public disclosures, with links back to original source filings.

Solar Car Design

HIGH SCHOOL PROJECT | AUTOCAD, TIG WELDING, FABRICATION

- Designed mechanical components in AutoCAD with structural efficiency, weight distribution, durability, and system integration in mind.
- Assisted with TIG welding and fabrication while coordinating with stakeholders, sponsors, and the machine-tool team.
- Worked across teams to resolve fitment and manufacturability issues so designed components could be assembled successfully.

EDUCATION

Bachelor of Science - Dual Major | University of Louisville J.B. Speed School of Engineering — **Expected Fall 2027**

Fields Computer Science and Mechanical Engineering

Coursework Data Structures, Programming, Computer Networks, Engineering Mechanics, Thermodynamics, and CAD Design

Associate of Applied Science | Jefferson Community and Technical College — **Completed**

Field Computer and Information Technologies

CREDENTIALS & PMP PROGRESS

Certifications CompTIA A+ • CompTIA Network+ • CompTIA Security+ • Autodesk Certified User - AutoCAD • Pipe Welding Certification

PMP pathway Completed 35 hours of project-management education and accumulated 22 months leading projects; 14 additional months of qualifying experience remain before exam eligibility.

TECHNICAL & PROFESSIONAL SKILLS

DATA & SOFTWARE
Python • SQL • Power BI • Excel • JavaScript • HTML/CSS • Git/GitHub

PROJECT DELIVERY
Project leadership • Stakeholder coordination • Cross-functional communication • Technical documentation

ENGINEERING
AutoCAD • TIG welding • Pipe welding • Mechanical fabrication

LANGUAGES
English • Arabic
